

Hard constraints

Executable masks remove invalid swaps before scoring.
The planner can choose only actions accepted by the environment.

Manuscript boundary

Positive anchor: Bishan 20x16/top5 under the matched protocol.
Fifty-state and cross-region rows are boundary or calibration evidence.

decision=stop

Stop path

Stop as diagnostics
No training on failed labels
Boundary evidence only

Reporting policy

Descriptive statistics only unless a new analysis plan is declared.
This schematic is workflow artwork, not a new experiment.
